

The RAWL Virtual CADLearning Center Online Learning Resources for Your School

Ronald A. Williams, Ltd. is now offering an internet based customized ***Virtual CADLearning Center***. What this means is that your school can have its own online learning platform for Autodesk architecture, engineering and design software. This platform is designed to provide your school's students and staff unlimited access to comprehensive online learning resources and video instruction for industry-leading software applications including **AutoCAD, AutoCAD Civil 3D, Autodesk 3ds Max, Autodesk Inventor, Autodesk Maya and Autodesk Revit Architecture**. These Virtual CADLearning courses include video tutorials, assessments and exercise files that allow users to follow along in their software 24 hours a day, seven days a week, anywhere there is an internet connection.

Imagine your school having its own private, branded Virtual CADLearning Center (VCC) providing courses in a hosted learning management system (LMS). With your own hosted LMS, your school can deliver an online training experience that complements classroom instruction. The VCC would not require any setup or maintenance on your part.

RAWL Virtual CADLearning Centers offer:

- Hosted Learning Management System – custom branded learning portal
- Comprehensive Training Library – more than 10,000 video tutorials for 20+ Autodesk software titles and regular courseware updates
- Customized Learning – customize your curriculum, add your own content
- Reduced Class Preparation Time – spend less time teaching software and more time inspiring design
- Student Progress Tracking – user reporting, assessments, and quizzes
- Preparation for Autodesk Certification Exams – prep courses align to exam objectives for Certified User, Certified Associate, and Certified Professional exams

Certification Prep Site

The ***RAWL CADLearning Certification Prep Site (CPS)*** is a subset of the full ***RAWL Virtual CADLearning Center*** that is focused squarely on preparing software users for **Autodesk Certification Exams**. Autodesk has a defined set of certification objectives and the lessons included in the ***RAWL CADLearning Certification Prep Site (CPS)*** concentrate on meeting those objectives so users are better prepared for the exams.
